Science and Engineering Team at Bergen Brickfest

The DMS Science and Engineering team competed for the second year in the Bergen Brickfest at Pascack Hills High School on Saturday, November 17th. We had two teams competing in 3 different areas: Project (research and develop a solution), Robot (build and program a Lego ev3 to carry out pre-determined tasks in a 2 and a half minute time frame), and Core Values (teamwork, gracious professionalism). The theme this year was Into Orbit and required researching many aspects of space travel. Congratulations to the Robocats for earning first place in Core Values and to both teams for a job well done.

Conferences

DMS held single session days with a 12:30 dismissal on November 27th and 28th. The intent of these conferences is clarity in communication between our teachers and parents. Our parents and guardians should always feel free to reach out to their child's teacher should they have questions or concerns.

5th & 6th Grade Dance

On the evening of November 30th, DMS held a dance for the fifth and sixth grade students. More than one hundred and twenty students enjoyed the DJ, photo booth and snacks. Thank you to our teachers and parents for serving as chaperones.

Thank you to the PTO leadership for the coordination of the event.
